DEMOGRAPHICS

CALIFORNIA DEPARTMENT OF FINANCE

CRAIG L. BROWN, DIRECTOR

Linda Gage, Chief
Mary Heim, Assistant Chief
Dolores Lykins, Coordinator

The Demographic Research Unit was established as the official State source to provide demographic data to all levels of government and to the private sector with information to aid in effective planning and policy making.

We invite readers to submit announcements of news and upcoming events, to suggest topics, and to respond to articles in *California Demographics*.

Message

By Linda Gage

from the State Demographer

Our Spring issue features the latest population estimates and a recent growth history for the State.

By law, we provide population estimates each May to the State and to local governments so that jurisdictions can determine their *spending limits*. Population growth is an important factor in determining whether and by how much the appropriations made by state and local government may increase each year. For this purpose, statute requires that the population estimates used by the State, the 58 counties and our 471 cities exclude persons in state mental institutions, federal military bases and state and federal prisons. For more general purposes, total population is used. The estimates presented here represent the total population.

Many people are interested in what contributes to population growth. The population of an area can change in one of three ways: births, deaths, and movement in or out of the jurisdiction. The number of deaths subtracted from the number of births is called *natural increase*. The number of people moving out of an area subtracted from the number of people moving in is called *net migration*. We present a table showing how these factors have influenced the State's growth since 1940.

Newsletters take time to write, produce and mail. We know that many of you need our data as soon as they are available. You can find our most current data on the internet first at www.dof.ca.gov.

California's Population Tops 33 Million

California's population grew by 582,000 people in 1997 to a total of 33,252,000 in January of 1998. This growth reflects a continuation of the domestic migration turnaround.

The new data show a 1.8 percent increase of population for the year, compared to the 1.4 percent growth posted in calendar year 1996.

The report includes preliminary January 1998 as well as revised January 1997 population data for the state, counties and cities. Highlights include:

California Cities:

- ✦ Of California's 471 cities, 446 gained population, 14 experienced no change, while the remaining 11 lost population.
- ✦ California's three largest cities—Los Angeles, San Diego and San Jose—experienced growth over the past year. Their percentage increases, respectively, were 1.3, 2.2 and 2.3 percent.
- ✦ Los Angeles continues to be the state's largest city, with a population of 3,722,500. San Diego remains the second largest city with 1,224,800 people.

California Counties

✿ Los Angeles had the largest calendar-year population increase of 48,000, followed by San Diego (25,800), San Jose (19,800), and San Francisco (16,800).

✿ Of the ten cities with the most numeric change last year, five are new on the list – Santa Clarita, Santa Rosa, Corona, Bakersfield and Salinas.

✿ Corcoran, the State's fastest-growing city, increased 22 percent. The growth resulted from the opening of a new prison, the California Substance Abuse Treatment Facility and State Prison.

✿ Four California cities grew by more than 10 percent during 1997. In addition to Corcoran, these are Brentwood (16.4 percent), Ferndale (14.6 percent), and Soledad (10.5 percent).

✿ The State added a new city – Citrus Heights in Sacramento County – in the past year. The city's population is estimated at 87,200.

✿ California's three largest counties – Los Angeles, San Diego and Orange – experienced growth rates of 1.4, 2.4 and 1.7 percent (respectively) in 1997.

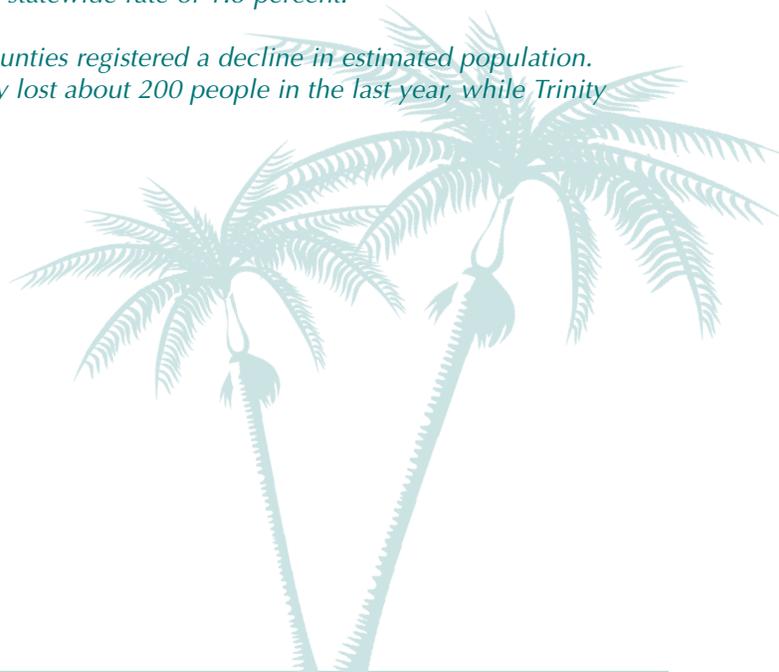

✿ Los Angeles County again posted the highest annual numerical population gain, adding 132,400 people in 1997 for a total of 9,603,300. San Diego County again posted the second highest numerical growth, gaining 65,700 for a total of 2,794,800. Orange County displaced Santa Clara County with the third highest numerical gain, adding 44,800 to total 2,722,300.

✿ In terms of percentage growth, Kings County captured first place, growing over 5 percent in the last year, at a pace slightly ahead of Monterey, which continues its fast growth pace with an annual change of 4.7 percent.

✿ Three counties – San Benito, Del Norte and Calaveras – posted growth rates between three and four percent, while another 14 counties posted growth rates between 2 and 3 percent.

✿ Twenty-four of California's 58 counties grew at a slightly faster pace than the statewide rate of 1.8 percent.

✿ Two of the counties registered a decline in estimated population. Lassen County lost about 200 people in the last year, while Trinity lost about 50.

Estimates of Population of the State of California With Components of Change 1940 - Present
